Specific static Java functions can be used in Pig like UDFs. Take a look at the following Pig
script:define hex InvokeForString('java.lang.Integer.toHexString','int');nums = load 'numbers' as (n:int);inHex = foreach nums generate hex ? ;Apart
from these three lines of code, what additional coding responsibilities do we have as developer here?
 a. There is nothing else to be done.
b. We need to write the toHexString() functionality, extending java.lang.Integer.
c. We need to write InvokeForString().
d. We need to register the jar containing java.lang.Integer.
. 0

Which guarantee that Hadoop provides does Pig break?
All values associated with a single key are presented by the same Parkings
a. All values associated with a single key are processed by the same Reducer. b. Colle to the Reducer's radius () method only accur of tar the left Manner has finished supplied.
b. Calls to the Reducer's reduce() method only occur after the last Mapper has finished running.
c. Task stragglers due to slow machines (not data skew) can be sped up through speculative execution.

od. The Combiner (if defined) may run multiple times, on the Map-side as well as the Reduce-side.
